

BR200BT / BR800BT Bluetooth Pairing with iPad

 *Save this guide as it may be needed to for pairing again in case iPad lose the pairing information*

The BR200BT and BR800BT Bluetooth Barcode Scanners work with HID Keyboard emulation for operations with iPad. It functions like there is a keyboard connection. Before the scanner works with the iPad, Bluetooth pairing is required.

1. Power on the scanner by holding down the trigger button for 2 seconds.
2. On the iPad, click the "Settings" icon.

4. Click "Bluetooth" to display the Bluetooth menu. If Bluetooth is off, click on the slide button to turn it on.
5. The scanner should be on the list of discovered devices. The device name of the scanner is BR200BT or BR800BT.

6. Select the device and you will be prompted to enter pairing pin code.
7. Scan the barcodes on the right to enter the required pin code displayed on iPad. Scan the "Enter" bar code to finish entering the code. A short beep will sound upon connection.
